

Setting Up Application Environment

IBM Cloud CLI

Date	03 November 2022
Team ID	PNT2022TMID15812
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

The screenshot shows a web browser displaying the IBM Cloud CLI documentation. The page title is "Getting started with the IBM Cloud CLI". The main content area includes a list of tools that can be installed: `git`, `Docker`, `Helm`, `kubectl`, and `curl` (Linux only). It also lists several IBM Cloud plug-ins: `IBM Cloud Functions plug-in`, `IBM Cloud Object Storage plug-in`, `IBM Cloud Container Registry plug-in`, and `IBM Cloud Kubernetes Service plug-in`. A tip box suggests trying out IBM Cloud Shell. On the right side, there is a "On this page" sidebar with a list of steps: "Before you begin", "Step 1: Run the installation command", "Step 2: Verify the installation", "Step 3: Install CLI plug-ins and tools", "Step 4: Configure your environment", and "Next steps". The "Before you begin" step is currently selected.
